v.

TOFIG KURBANOV d/b/a FLVTO.BIZ and
2CONV.COM;
And DOES 1-10,

Defendants.

Case No.
1:18-CV-00957-CMH-TCB

DECLARATION OF TOFIG KURBANOV
IN SUPPORT OF MOTION TO DISMISS

I, Tofig Kurbanov, declare and state as follows:

1. My name is Tofig Kurbanov. I am over the age of 18 years. I make this declaration based upon personal knowledge and my review of business records. All statements contained in this declaration are true and correct to the best of my knowledge. If called as a witness, I could and would testify as to the facts set forth in this declaration.

2. I was born in Rostov-on-Don in Russia. I currently live in Rostov-on-Don in Russia.

3. I have never been to the United States of America (including the Commonwealth of Virginia).

General Background on the Websites

4. I operate the websites flvto.biz and 2conv.com (the “Websites”).

5. The Websites allow visitors to save the audio tracks from online videos to their computers without necessarily saving the video content as well.

6. The functionality of the Websites is content neutral and there are substantial non-infringing reasons why users would utilize the Websites. For example, professors or students might choose to download the audio portions of lectures for later reference and playback; bands may want to capture the audio tracks from their live performances that they have captured on video; parents may want the audio portion of a school concert that they recorded; or any other number of non-infringing uses.

7. As the Websites themselves make clear, they can be used with a variety of websites other than YouTube from anywhere around the world. Attached hereto as Exhibit 1 is a screenshot of the flvto.biz website taken on September 30, 2018 explaining that this is true.

No Business in Virginia or the United States

8. Substantially all of the work that I have done for the Websites I have done from in Russia.

9. Given that I have never been to the United States, I have never done any work for the Websites from inside the United States (including Virginia).

10. I do not have any employees or other personnel who travel to the United States (including Virginia) to conduct business.

11. I have never done business in Virginia or the United States. I have never knowingly solicited business in Virginia or the United States.

12. I have never had any employees in the United States (including Virginia).

13. I have never had a bank account in the United States (including Virginia).

14. I have never owned or leased real estate in the United States (including Virginia).

15. I have never had a telephone number in the United States (including Virginia).

16. I have never paid taxes in the United States (including Virginia).

17. I have not engaged in any persistent course of conduct (or any conduct at all) in Virginia or the United States.

18. I have never derived revenue from services rendered in Virginia or the United States.

19. I have never had an agent for service of process in the United States (including Virginia).

20. The Websites are not specifically targeted at Internet users in the United States or Virginia. The Websites are not targeted to any particular country at all, but rather they are targeted at the entire world of eligible Internet users.

21. In fact, the flvto.biz website is available in 23 different language, including Italian, Portuguese, Polish, Turkish, Japanese, Korean, Russian and Arabic.

22. The Websites are free to use. Accordingly, no users from the United States (including in Virginia), or anywhere else for that matter, make any payments to me for using the Websites or for the services available to users on the Website.

Advertisements on the Websites

23. Virtually all the revenue derived from the Websites comes from advertisements, with approximately 95% of the revenue from advertisements directly on the Websites and approximately 5% coming from advertisements in the downloadable desktop applications available on the Websites.

24. I do not have any direct relationship with any of the end-advertisers on the Websites. I do not sell advertisements myself directly nor do I interact with advertisers. Instead, from in Russia, the Websites have agreements with advertising brokers, which in turn have relationships with the advertisers.

25. All of the paid advertising that appears on the Websites are not sold by me, but are rather sold through a small number of advertising brokers.

26. The Websites make available to the broker “space” on the Websites, and the broker then sells that space as it sees fit to its advertiser clients. An advertiser buys (from the broker) the right to display whatever advertisements it chooses in the space provided on the Websites as long as it complies with law and the broker’s rules.

27. I do not personally cause any specific advertisements to be directed to visitors from specific locations (like Virginia or the United States).

28. However, advertising brokers or their advertisers might themselves be interested in only serving advertisements to specific blocks of countries or to show specific advertisements in specific places. In other words, although it is possible for an advertiser to have its advertisements be targeted to viewers in a specific country or an even more limited geographic area, any “geolocation” or “geo-targeting” is performed (when it is performed at all) by the brokers themselves (or their advertisers) and not by me or anyone else on my behalf.

29. Although the advertising broker may allow its advertisers to choose which specific country their advertisements are displayed, that process, if it takes place at all, happens before the broker places the advertisements on the Websites and without any input from me or anyone on my behalf.

30. The process for “interest-based targeting” of advertisements is totally in the control of the brokers and their advertisers.

31. I should make clear that the geolocation/geo-targeting and interest-based targeting of advertisements I have been speaking about are not advertisements of the Websites, but rather they are advertisements promoting the products or services of the advertisers themselves. Advertisements that appear on the Websites link to third-party websites.

32. In other words, I am not advertising the Websites into the United States (or Virginia) by virtue of these advertisements.

33. In fact, the Websites are not advertised at all – whether within the United States or elsewhere.

Users of the Websites

34. The Websites have visitors from over 200 distinct countries around the world.

35. Attached hereto as Exhibit 2 is a true and correct screenshot of data gathered through Yandex Metrika (omitting some irrelevant information and trade secrets) showing the number of users and the number of sessions from countries around the world for the period October 1, 2017 through September 30, 2018 for the 2conv.com website.

36. As you can see from the statistics from the 2conv.com website, out of all users during that time period, only 5.87% of the users are from the United States and the website gets

more users from Italy (8.89%), Brazil (9.78%), and Mexico (8.83%). This means that over 94% of the users of the 2conv.com website come from outside the United States.

37. Exhibit 1 also splits out which specific states from inside the United States users come from. As you can see, 2conv.com gets far more users from the State of California than it does from any other state, with users from California making up 11.26% of United States users. The second highest state is Texas with 6.48%. Only 1.75% of United States users came from Virginia, making it the 11th state on the list.

38. Attached hereto as Exhibit 3 is a true and correct screenshot of data gathered through Yandex Metrica (omitting some irrelevant information and trade secrets) showing the number of users and the number of sessions from countries around the world for the period October 1, 2017 through September 30, 2018 for the flvto.biz website.

39. As you can see from the statistics from the flvto.biz website, out of all users during that time period, only 9.92% of the users were from the United States and the website got more users from Turkey (11.21%) and Brazil (10.19%). Moreover, 8.15% of users came from France and 7.89% came from Mexico. This means that over 90% of the users of the flvto.biz website come from outside the United States.

40. Exhibit 2 also splits out which specific states from inside the United States users come from. As you can see, flvto.biz gets far more users from the State of California than it does from any other state, with 10.65% of United States users coming from California. The second highest state is New York with 6.16% of users. Only 1.70% of United States users come from Virginia, making it the 13th state on the list.

41. Users of the Websites do not need to create an account, register, or sign in to use the services of the Websites.

Hosting for the Websites

42. As of August 3, 2018, the Websites were not, and currently they are not, hosted in Virginia or the United States. The Websites are currently hosted with a company called Hetzner Online GmbH (their website is hetzner.com). It is my understanding based on my interactions with them that they are a company organized in and based in Germany.

43. The Websites were previously hosted with Amazon Web Services ("AWS"), which I understand to be one of the world's largest hosting companies. The agreement to host the Websites with AWS was entered into from Russia. It appears that while the Websites were hosted with AWS, the Websites may have been hosted from servers physically located in Virginia, among other places that AWS physical has servers.

44. However, in July of 2018, before the lawsuit in this case was filed, the hosting for the Websites was moved to Hetzner Online GmbH.

Travel to the United States

45. It would be extremely burdensome and costly for me to travel to Virginia (or anywhere else in the United States) for trial and other proceedings in this case.

46. I do not have a visa to visit the United States nor have I ever applied for or obtained a visa to visit the United States.

Signed under the pains and penalties of perjury, this 1st day of October, 2018.

Tofiq Kurbanov

Listen To Your Music Anywhere

Do you want to listen to your tracks without video? When you use Flvto.biz, you will not be limited to converting tracks to the MP3 format. Our YouTube video downloader allows you to convert from YouTube to [MP3 320kbps](#), or any other alternative format, so that you can seamlessly transfer the MP3 files you downloaded from your desktop to your MP3 player, phone, or music library.

Online YouTube Video Downloader

Don't worry, despite the name, our YouTube Downloader can also convert music from other websites too. Use our converter to get music from a number of alternative video-hosting sites including Vimeo, Dailymotion, [Metacafe](#), [Facebook](#), and more! Simply paste the URL from any site and get your video to an [MP3 in high quality](#).

How to use Flvto YouTube Converter?

- 1 Copy a link to a YouTube video and paste it into the Flvto input field
- 2 Choose the file format you want
- 3 Click the 'Convert' button
- 4 Download your MP3 file

Check out these entries in the "How To" section if you want to learn more about how to use Flvto.
